

# Table of Contents

Preface	iii
Organizing Committees	xvi
<b>OPTIROB 2011 Session 1</b>	
Aspects regarding the integration of flexible wing concept in small unmanned aerial vehicles <i>Mircea Boscoianu, Vasile Prisacariu, Ionica Circiu and Cristea Gabriel Rau</i>	1
Aspects regarding the disc brake's thermal stress simulation by using Infrared Thermography <i>Catalin Spulber and Stefan Voloaca</i>	7
Assisted Research and Optimization of the proper Neural Network Solving the Inverse Kinematics Problem <i>Adrian Olaru, Serban Olaru, Dan Paune and Oprean Aurel</i>	15
Military R&D Involvement in Developing Unmanned Systems for Defense and Security <i>Liviu Cosoreanu and Tiberius Tomoiaga</i>	24
Design Of Humanoid's Lower Limb Model <i>Mikuláš Hajduk, Marek Sukop, Luboš Marko and Jozef Varga</i>	31
<b>OPTIROB 2011 Session 2</b>	
Human Upper Limb Robotic System Experimental Analysis by Using CONTEMPLAS Motion software <i>Copilusi Cristian, Grecu Valentin and Dumitru Nicolae</i>	38
Modeling and Simulation of a 6 DOF Robot <i>Monica Enescu and Catalin Alexandru</i>	44
Design of Special Clamp for Manipulating with Tools, Micro and Nano Objects <i>Radostina Petrova, Penka Genova and Kostadin Kostadinov</i>	49
Increasing the Operating Safety of the Machine-Tools by Using Hydro-pneumatic Accumulators. Modeling - Simulation <i>Dan Prodan, Anca Bucuresteanu and Emilia Balan</i>	54
An Approach for Simulation design of Mechanical Assembled units <i>Georgi Dinev</i>	60
<b>OPTIROB 2011 Session 3</b>	
Development of correlative investigation technique (CIT) of human performances in specific conditions of postural malfunctions <i>Mihaela Baritz and Diana Cotos</i>	66
Computer modeling and simulation <i>Naqib Daneshjo</i>	73
Mechanical Loading of R-R-T Dyade	77

GA Based Trajectory Generation for a 7-DOF Biped Robot by Considering Feet Rotation during Double Support Phase	83
---	----

*Farsam Farzadpour and Mohammad Danesh*

Study of Circular Tapping Plates, with a Circumferential Vertical Load at the Interior Boundary by Transfer-Matrix Method	88
---	----

*Mihaela SUCIU*

#### **OPTIROB 2011 Session 4**

The Dynamic Behavior of the Elevation Movement Mechanism of one Transfer Manipulator with Electro-Hydraulic Acting	94
--	----

*Corneliu Cristescu, Petrin Drumea, Liliana Dumitrescu , Ioana Ilie and Constantin Chirita*

FEA Analysis for Frequency Behavior of Industrial Robot's Mechanical Elements	99
---	----

*Alin Ristea*

Effect of Intermediate Location and Time-Varying End Mass on the Dynamic Response of a Flexible Robot Manipulator in Tracing Multi-Straight-Line Path	102
---	-----

*Mostafa Ghayour and Mojtaba Kazemi*

Study upon the dynamic answer of plane manipulators	109
---	-----

*Ionut Geonea, Alexandru Margine and Alin Ungureanu*

Designing the tracking system for a string of photovoltaic modules	114
--	-----

*Nicoleta-Irina Tatu and Cătălin Alexandru*

#### **OPTIROB 2011 Session 5**

Hydraulic Positioning Unit with Internal Mechanical Position Feedback	120
---	-----

*Mihai Avram, Constantin Bucșan, Despina Duminiță and Victor Constantin*

An Analysis Method of the Electro-hydraulic Rotational Module	125
---	-----

*Ioan Barsan and Ilie Popp*

Experimental Researches On The Elaboration And The Integration Of The Special Procedures And Technologies Of Master Mask Generation For Position Incremental Photo-Electrical Sensors Used In Robots And Automated Production Systems	130
---	-----

*Gheorghe. Gheorghe, Donțu Octavian, Bratu Vasile, Cârstoiu Adriana, Istriteanu Simona and Despa Veronica*

Contribution to Stability Control of Nonlinear Systems	135
--	-----

*Ivan Svarc and Radomil Matousek*

Electronic Interface for Pneumatic Grippers Using USB Port	140
--	-----

*Ciprian Ion Rizescu, Dana Rizescu and Georgeta Ionașcu*

#### **OPTIROB 2011 Session 6**

Off-line programming of industrial robots using co-located environments	145
---	-----

*Florin Girbacia*

Real-time gesture recognition for controlling a virtual hand	150
--	-----

Software Module for Objects Shape Tracing and Recognition Before Gripping <i>Ionel Staretu and Alexandru Itu</i>	155
Development of Mist-Cyclone System for Hydrogen Sulfide Sampling in Sewer Line <i>Osamu Matsubar, Zhiheng Jiang and Shigeki Toyama</i>	160
Aspects of biped robot stabilization <i>Mate Csaba Zoltan and Cristea Luciana</i>	164
<b>OPTIROB 2011 Session 7</b>	
Production planning process in a manufacturing cell <i>Claudia Raluca Tudorie</i>	169
Selection of simulation software by algorithm <i>Jana Hlubeňová and Daniel Hlubeň</i>	174
PLM System for Complex-Shape Aircraft Gas Turbine Parts <i>Mircea Dan Ionescu, Doina Marin and Nicolae Predinca</i>	179
Optimization of the Wind Systems, Based on the Maximum Wind Energy <i>Cristian Chioncel, Marius Babescu and Petru Chioncel</i>	184
The view to the current state of robotics <i>Marek Vagaš, Ján Semjon, Mikuláš Hajduk, Lucia Páchniková and Michal Lipčák</i>	190
<b>OPTIROB 2011 Session 8</b>	
Using the Web by Finnish SMEs for corporate social responsibility activities <i>Elena-Simina Lakatos, Roxana-Mirela Gazdac and Viorel Dan</i>	195
Multiaxis Flexible Cell for Laser Precision Machining. Design and Applications <i>José Luis Ocaña, Carlos Molpeceres, Juan José Garcia-Ballesteros, Sara Lauzurica and Danut Iordachescu</i>	200
Development of Robotized Laser Welding Applications for Joining Thin Sheets <i>Danut Iordachescu, Manuel Blasco, Raul Lopez, Alberto Cuesta, Mihaela Iordachescu and José Luis Ocaña</i>	205
Author Index	207
