I am hoping that this book will provide motivation and food for critical thoughts to high school and university students and other newbies for a successful trading journey. In their later years, in this book, the author dives deep into a few specific stock trading steps such as 1) use of free tools and resources to trade any stock markets of the world, 2) identify leading sectors, 3) identify leading stocks within the leading sectors, 4) use of relative strength to ensure the stocks and sectors are outperforming the broader market, 5) determine optimal position size based on your risk tolerance level, 6) use of a stock scanner to automate the process. Much more author the author has been trading the stock market since 1999. He is a DIY do it yourself investor. He worked as an engineer for 26 years before retiring in 2015. Although he is an engineer by training, Ph.D. in civil engineering from the University of Alberta, he is very much passionate about trading and investing. After retiring, he is more focused on doing things that he enjoys the most such as managing investments, writing books, and blogs thinkandretire.com traveling amongst others.

trading the stock market with its infinite possibilities requires a trading plan and trading rules to reduce the noise it is extremely important to have trading rules for your entry holding time of a stock call or put option and exit trading rules create order and direction in a chaotic trading environment the most successful stock and option traders are those having trading rules they live by and act on those rules without hesitation the most successful traders know how to keep their stock and option loses small it is not the size of your gains but the size of your losses that really count they know how to use their trading past as a guidepost and not as a whipping post the most successful traders know how to take a loss they accept loss as part of the trading arena they regularly keep a trading journal for all their trades wither it was a live trade or a practice trade it is okay to have a loss but learn the lesson from the trade and vow to never repeat that mistake again your first lost is the best lost trading rules act like a filter and greatly filters the noise that is not applicable in the trading world for that day or for that moment if you are trading the stock market and have several losses it is because you have no trading plan and you have no trading rules within that plan in trading i take full responsibility for my gains and losses while using trading rules as guidance when i am in a live trade i always keep an emotional balance confidence is gained thru memorization of trading rules and tons of practice in the paper money account on think or swim think or swim by td ameritrade is a free trading platform to use but you will have to pay for commissions only when buying and selling stock calls and put options think or swim has a paper money account that you can do everything as in a real trade but with fake money think or swim also has a trading app for your cell phone too all my professional stock and option settings and indicators i use to trade with for think or swim is in the appendix also the think or swim settings for my cell phone app is in the appendix of this book too the settings are there for you to copy and are there for you to install and use on your own think or swim trading accounts and cell phone app my settings are critical for a person s trading success its highly recommended that you practice stock and option trading in the
paper money account for 1 year before using real money in the trading leg on think or swim by regular practice your will be able to reduce the emotional part that can be stirred up by live trading produced by fear and greed you must learn how to eliminate fear and greed or it will kill you in the stock market great confidence and low emotions are key to success good luck and with god's speed
