Learning links provide students with practice searching the web for information. Learners choose from a variety of web links and report back findings to their instructor through e-mail. Discussion questions enable distance learning students to take part in a stimulating classroom discussion. The glossary provides term definitions, pronunciation, and illustrations for select terms. Easy-to-use tools help you customize the course to your needs. Class notes are helpful tips for students to remember word parts and provide further clarification and expansion of text material. Online exercises including quizzes, self-test questions, pretest, mid-term, and final exam with rationale for right and wrong answers provide students with immediate feedback and guidance for further study. Frequently asked questions related to each chapter provide answers to questions asked by other students. Using tutor can gain valuable information by paying close attention to these questions and answers just as students would in the classroom.

Medical Terminology for Health Professions with Web Tutor

2001

Building medical terms is much like piecing together a puzzle of prefixes, suffixes, and combining forms in the same way human anatomy is an intricate puzzle of body parts interlocking with each other to form a complex set of systems. Unlocking medical terminology embraces these analogies as it guides users through the assembly of medical terms in a fun, engaging, and interactive way. This resource provides interesting and engaging applications presented in an interactive self-study format to increase the user's understanding of medical terminology. Included are a decoder key to reveal the hidden answers on each exercise, page crossword puzzles and word jumbles in each chapter, case studies, challenging games and quizzes, along with flashcards, videos, and animations on a feature-packed CD-ROM that comes free with each book. A step-by-step approach allows users to learn the core elements of medical terminology: word parts, anatomy, physiology, and word building. Each step includes a word parts focus, getting to the root of it, and constructing terms. This title also features artwork by F. Netter, M.D., all health professionals and medical terminology students.
