The Dutch Republic: Its Rise, Greatness, and Fall

The Dutch Golden Age known for its renowned artists and writers was also remarkable for its immense impact on the spheres of commerce, finance, shipping, and technology. The Electrifying Story of Abraham Lincoln's Rise to Greatness during the Most Perilous Year in Our Nation's History as 1862 Dawns

The American Republic was at death's door. The Federal Government appeared overwhelmed. The U.S. Treasury was broke. The Union's top general was gravely ill. The Confederacy, with its booming economy, expert military leadership, and commanding position on the battlefield, had a clear view to victory. To a remarkable extent, the survival of the country depended on the judgment, cunning, and resilience of the unschooled frontier lawyer who had recently been elected president. Twelve months later, the Civil War had become a cataclysm, but the tide had turned. The Union generals who would win the war had at last emerged and the Confederate army had suffered the key losses that would lead to its doom. The blueprint of modern America, an expanding colossus of industrial and
financial might had been indelibly inked and the man who brought the nation through its darkest hour
abraham lincoln had been forged into a singular leader in rise to greatness acclaimed author david von
drehle has created both a deeply human portrait of america s greatest president and a rich dramatic

spectacular changes in people's health in europe since the early 18th century most of the 40 specific
Diseases covered in this book show a fascinating pattern of rise and fall with large differences in timing between countries using a unique collection of historical data and bringing together insights from demography, economics, sociology, political science, medicine, epidemiology, and general history. It shows that these changes and variations did not occur spontaneously but were mostly man-made throughout European history. Changes in health and longevity were therefore closely related to economic, social, and political conditions with public health and medical care both making important contributions to population health improvement. Readers who would like to have a closer look at the quantitative data used in the trend graphs included in the book can find these here.

Exceptionalist ideas have long influenced British foreign policy as Britain begins to confront the challenges of a post-Brexit era in an increasingly unstable world. A re-examination of the nature and causes of this exceptionalist bent is in order. Arguing that Britain's search for greatness in world affairs was and still is a matter of habit, Srdjan Vucetic takes a closer look at the period between Clement Attlee's New Jerusalem and Tony Blair's New Labour. Britain's tenacious pursuit of global power was never just a function of consensus among policymakers or even political elites; more broadly, it developed from popular everyday and gradually evolving ideas about identity circulating within British culture and more specifically English society. As a whole, to uncover these ideas, Vucetic works with a unique archive of political speeches, newspapers, history textbooks, novels, and movies across colonial, Cold War, and post-Cold War periods. "Greatness and Decline" sheds new light on Britain's interactions with the rest of the world while demonstrating new possibilities for constructivist foreign policy analysis.

Why are we speaking English? Replenishing the Earth gives a new answer to that question, uncovering a settler revolution that took place from the early nineteenth century, leading to the explosive settlement of the American West and its forgotten twin, the British West, comprising the settler dominions of Canada, Australia, New Zealand, and South Africa between 1780 and 1930. The number of English speakers rocketed from 12 million in 1780 to 200 million, and their wealth and power grew to match their secret was not racial or cultural or institutional superiority but a resonant intersection of historical changes, including the sudden rise of mass transfer across oceans and mountains, a revolutionary upward shift in attitudes to emigration, the emergence of a settler boom mentality, and a late flowering of non-industrial technologies. This revolution combined with the industrial revolution to transform settlement into something explosive capable of creating great cities like Chicago and Melbourne and large socio-economies in a single generation. When the great settler booms busted as they always did a second pattern set in links between the Anglo Wests and their metropolises London.
and New York actually tightened as rising tides of staple products flowed one way and ideas the other. Re-colonization re-integrated Greater America and Greater Britain bulking them out to become the superpowers of their day. The settler revolution was not exclusive to the anglophone countries. Argentina, Siberia, and Manchuria also experienced it, but it was the anglophone settlers who managed to integrate frontier and metropolis most successfully and it was this that gave them the impetus and the material power to provide the world’s leading superpowers for the last 200 years. This book will reshape understandings of American, British, and British Dominion histories in the long 19th century. It is a story that has such crucial implications for the histories of settler societies, the homelands that spawned them, and the indigenous peoples who resisted them that their full histories cannot be written without it. This book is the result of the work of many people and while I discuss many of them in the general context of this book, in Chapter 1, I would like to emphasize here the contribution of all those people involved. My apologies in advance to any I have omitted to mention. The backbone of the book is based on a project, Farm Lives, conducted between 1999 and 2002, funded exclusively by the McDonald Institute for Archaeological Research at the University of Cambridge. Without their essential financial support, this would not have been possible. The project involved three components: archaeological fieldwork, archive research, and oral history interviews for the fieldwork. Special thanks go to Marcus Abbott, Jenny Bredenberg, Glenda Cox, Olivia Cyster, Andy Hall, Odile Peterson, and Sarah Winter for their excavation analysis. I thank Duncan Miller, University of Cape Town; Peter Nilsson, South African Museum; and Jane Klose, University of Cape Town, for the archive research. I would like to thank J. Malherbe, Huguenot Museum, and Harriet Clift, South African Heritage Resources Agency, but most of all, Jaline de Villiers, Paarl Museum, for the oral history. My thanks go to Sarah Winter, Rowena Peterson, and Jaline de Villiers for conducting interviews and to the informants Johanna Dressier, Louisa Adams, Geoffrey Leslie Hendricks, William Davids, Absolom David Lackay, John Cyster, November, and Lillian Aubrey Idas. This volume deals with the tracts, Latin and vernacular, published in the Netherlands on the comets of 1577 and 1618. Central to the book is the question of how these cometary appearances influenced the Aristotelian worldview. This is the first lengthy examination of the decline of Aristotelian cosmology in the Netherlands. Its demonstration of the connection between cosmological and political views renders the book useful to historians of general Dutch history as well as historians of science. The sinews of Habsburg power explores the domestic foundations of the immense growth of central European Habsburg power from the rise of a permanent standing army after the Thirty Years War to the end of the Napoleonic Wars with a force that grew irregularly in size from around 25,000 soldiers to as many as...
half a million in the war of the sixth coalition the habsburg monarchy participated in shifting international constellations of rivalry from western europe to the near east and in some two dozen partly overlapping armed conflicts raising forces of such magnitude constituted a central task of habsburg government one that ultimately required the cooperation of society and its elites the monarchy’s composite territorial structures in the guise of the lower austrian estates a leading representative body and privileged corps formed a vital if changing element underlying habsburg international success and resilience with its capital at vienna the archduchy below the river enns the historic designation of lower austria was geographically politically and financially a key habsburg possession fiscal military exigency induced the estates to take part in new and evolving arrangements of power that served the purposes of government in turn the estates were able in previously little understood ways and within narrowing boundaries to preserve vital interests in a changing world the estates survived because they were necessary not only thanks to their increasing financial potency but also because they offered a politically viable way of exacting ever larger quantities of money men and other resources from local society these circumstances would persist as ruling became more regularized formalized and homogenized and as the very understanding of the estates as a social and political phenomenon was evolving sam cherribi is a moroccan muslim who became a naturalized dutch citizen and member of the dutch parliament in this book he draws on his personal experiences with european politics and media extensive fieldwork in dutch mosques and interviews with imams in recent years the netherlands has been swept by the same forces of change that have swept the rest of europe the consolidation of the european union a massive influx of muslim immigrants and the rising voice of islamic fundamentalism cherribi argues that this small country has amplified these forces providing a useful lens through which to examine trends in all of europe the portents are troubling he notes as evidenced by the murders of journalist pim fortuyn and filmmaker theo van gogh after which riots broke out mosques were burned and muslims were openly reviled by the public and the media cherribi himself was voted out of parliament in the anti migrant fervor that engulfed the netherlands after these murders and like many other dutch muslims he emigrated to the united states looking back on these events and bringing to bear his skills and training as a sociologist cherribi provides an invaluable account of one country’s encounter with some of the most troubling trends of our times what explains the rapid growth of state power in early modern europe while most scholars have pointed to the impact of military or capitalist revolutions philip s gorski argues instead for the importance of a disciplinary revolution unleashed by the reformation by refining and diffusing a variety
of disciplinary techniques and strategies such as communal surveillance control through incarceration and bureaucratic office holding Calvin and his followers created an infrastructure of religious governance and social control that served as a model for the rest of Europe and the world.

Culture and Customs of the Netherlands 2009-09-23 sam cherribi is a moroccan muslim who became a naturalized dutch citizen and member of the dutch parliament in this book he draws on his personal experiences with european politics and media extensive fieldwork in dutch mosques and interviews with imams in recent years the netherlands has been swept by the same forces of change that have swept the rest of europe the consolidation of the european union a massive influx of muslim immigrants and the rising voice of islamic fundamentalism cherribi argues that this small country has
amplified these forces providing a useful lens through which to examine trends in all of europe the
portents are troubling he notes as evidenced by the murders of journalist pim fortuyn and filmmaker
theo van gogh after which riots broke out mosques were burned and muslims were openly reviled by
the public and the media cherribi himself was voted out of parliament in the anti migrant fervor that
engulfed the netherlands after these murders and like many other dutch muslims he emigrated to the
united states looking back on these events and bringing to bear his skills and training as a sociologist
cherribi provides an invaluable account of one country s encounter with some of the most troubling
trends of our times
