examines the international investment agreements and the dispute settlement mechanisms contained therein which bind the Gulf Cooperation Council member states. The Gulf Cooperation Council (GCC) comprising Bahrain, Kuwait, Oman, Qatar, Saudi Arabia, and the United Arab Emirates is complex and unique. Recently, all member states have experienced increasing investor state arbitration claims, while their nationals are increasingly instituting investor state arbitrations to protect their own foreign investments. Intra-GCC disputes, though relatively rare, have also appeared largely as a result of the recent Gulf crisis. While focusing particularly upon the investor state dispute settlement experience of member states as respondents, the book also explores the experiences of their nationals as claimants to determine how they can approach investor state dispute settlement in the future. The book also reflects on existing treaty-making practices, making recommendations for regional-level dispute settlement to improve upon investor state dispute settlement outcomes.

This book provides a detailed analysis of the global investor state dispute settlement regime and international investment agreements and it will be of interest to students, academics, and practitioners with an interest in international investment law and arbitration. money or kala dhan is a topic that has elicited much debate in recent times. This has been mostly marked by mudslinging and name calling and the discussions that have ensued often have no basis in fact. While most people have a hazy notion of black money, only a few understand it in its entirety. The issue of tax havens is perhaps even more misunderstood. Most people fail to see the connection between tax havens and black money. Black money and tax havens is the first work that discusses both of these issues in depth and offers a 360-degree view to the reader. In this work, R. Vaidyanathan provides the reader with a brief overview of black money. Its generation, its estimates, and how and why it is spirited away to tax havens. He also lays bare the danger that is posed to world financial well-being on account of the lack of political will to tackle these issues. A unique and timely work, this book packs in much information in an accessible manner.

Radio frequency identification (RFID) is a method of remotely storing and receiving data using devices called RFID tags. This method brings many real business benefits to today’s organizations. Over the years, RFID research has resulted in many concrete achievements and also contributed to the creation of communities that bring scientists and engineers together with users. This book includes valuable research studies of the experienced scientists in the field of RFID, including most recent developments. The book offers new insights, solutions, and ideas for the design of efficient RFID architectures and applications. While not pretending to be comprehensive, its wide coverage may be appropriate not only for RFID novices but also for engineers, researchers, industry personnel, and all possible candidates to produce new and valuable results in the RFID domain.

India’s Evolving Deterrent Force Posturing in South Asia

2020-12-16

the book discusses india s evolving deterrent force posturing in south asia under the conceptual essentials of nuclear revolution when it comes to various combinations of conventional and nuclear forces development and the strategic implications it intentionally or unintentionally poses for the south asian region the book
talks about how the contemporary restructuring of India's deterrent force posture affects India's nuclear strategy in general and how this in turn could affect the policies of its adversaries China and Pakistan in particular. Authors discuss the motivations of such posturing that broadly covers India's restructuring of its nuclear draft doctrine and the ballistic missile development program including that of its ballistic missile defence BMD system and the possibility of conflicts between China, India, and India-Pakistan given their transforming strategic force postures and their recurring adversarial behavior against each other in the southern Asian region.

The Economic Lifecycle, Gender and Intergenerational Support

2013-10-08

dthis book examines economic transfers across generations and genders from a European perspective. It addresses key challenges that contemporary societies face in regards to ageing, welfare sustainability, and intergenerational and gender equity. Coverage also offers important insights into an often invisible side of the economy: the contribution of women who, because of the gender contract, largely engage in unpaid work in the household. The book presents a detailed analysis of resource reallocation across population members in Italy, which encompasses the age and gender perspective. The public and private sector and the market and non-market dimensions of the Italian economy. This innovative and comprehensive case study presents valuable information on how intergenerational obligations are split between the family and the state. The author also explores the possible economic consequences of future ageing by using demographic projections and estimated age profiles of production and consumption by incorporating services originating from unpaid work in its analysis. This monograph corrects the traditional under-evaluation of the ways homemakers contribute to the economy and offers an important addition to studies on generational economy. The national transfer accounts project in particular the methods presented inside though using data specific to Italy are relevant for all European countries and will appeal to readers with an interest in welfare studies and policies.

Digital Transformation in The Recording Industry

2023-10-23

The recording industry has famously been transformed by technology throughout its entire history. The book presents an analysis of these changes using Porter's five forces model. The author highlights the evolution of buyers and suppliers, power, the emergence of new competitors, product innovation, and rivalry between companies in the industry driven by economic, political, social, and legal factors. As an early mover in the social diffusion of copyright-sensitive content, the recording industry reflected in this book serves as an important reference for the analysis of other cultural and creative sectors.

Black Money and Tax Havens

2011-06-15

Just how much black money is there in India? Estimates vary from 10 per cent to 20 per cent of our GDP. Conservatively, Rs 15 lakh crore, 10 per cent of Rs 150 lakh crore, our GDP in 2016-17. As for Indian money in tax havens around the world, around Rs 65 lakh crore, truly astounding figures. Black money or kala dhan is a topic that has elicited much debate in recent times. This has been mostly marked by mudslinging and name calling, and the discussions that have ensued often have no basis in fact. While most people have a hazy notion of
black money only a few understand it in its entirety the issue of tax havens is perhaps even more misunderstood most people fail to see the connection between tax havens and black money black money and tax havens is the first work that discusses both of these issues in depth and offers a 360 degree view to the reader in this work r vaidyanathan provides the reader with a brief overview of black money its generation its estimates and how and why it is spirited away to tax havens he also lays bare the danger that is posed to world financial well being on account of the lack of political will to tackle these issues a unique and timely work this book packs in much information in an accessible manner
