How to do discourse analysis is an essential book for advanced undergraduate and postgraduate students working in the areas of applied linguistics, education psychology, anthropology, and communication. In this essential guide, Meghan Casey outlines a step-by-step approach for doing content analysis from planning and creating your content to delivering and managing it. Armed with this book, you can confidently tackle difficult activities like telling your boss or client what's wrong with their content, getting the budget to do content work, and aligning stakeholders on a common vision. Reading the content strategy toolkit is like having your own personal consulting firm on retainer with a complete array of tools and tips for every challenge you'll face. In this practical and relevant guide, you'll learn how to identify problems with your content and persuade your bosses it's worth the time and resources to do it right, make sense of your business environment, and understand your audience. The toolkit is designed for policy makers and stakeholders who are considering the establishment of a publicly funded asset management company (AMC). An AMC is a statutory body or corporation fully or partially owned by the government, usually established in times of financial sector stress to assume the management of distressed assets and recoup the public cost of resolving the crisis. AMCs were first used in the early 1990s in Sweden (Securum) and the United States (RTC) and again during the Asian crisis for instance Danaharta in Malaysia and Kamco in the Republic of Korea. The 2008 financial crisis marked a renewal of the use of this tool to support the resolution of financial crises. For instance, NAMA in Ireland and SAREB in Spain, the toolkit does not address broader bank resolution issues. It has a narrow focus on the specific tool of a public AMC established to support bank resolution and with the objective of providing insight on the design and operational issues surrounding the creation of such AMCs. It seeks to inform policy makers on issues to consider if and when planning to establish a public AMC. The toolkit is structured as follows: Part I summarizes the findings on the preconditions, the design, and the operationalization of public AMCs. Part II provides case studies on three generations of AMCs whose lessons are embedded in Part I. The case studies cover emerging and developed markets and have been selected based on the lessons they offer from the book's signature toolkit approach to the new chapter on the environment and sustainability in the accompanying videos and interactive learning tools. All aspects of Ken Guest's cultural anthropology work together to inspire students to use the tools of anthropology to see the world in a new way and to come to class prepared to have richer, more meaningful discussions about the big issues of our time. **Public Asset Management Companies**

2016-05-31
This toolkit is designed for policy makers and stakeholders who are considering the establishment of a publicly funded asset management company. An AMC, or asset management company, is a statutory body or corporation fully or partially owned by the government, usually established in times of financial sector stress to assume the management of distressed assets and recoup the public cost of resolving the crisis. AMCs were first used in the early 1990s in Sweden (Securum) and the United States (RTC) and again during the Asian crisis for instance, Danaharta in Malaysia, Kamco in the Republic of Korea. The 2008 financial crisis marked a renewal of the use of this tool to support the resolution of financial crises. For instance, NAMA in Ireland, SAREB in Spain. The toolkit does not address broader bank resolution issues; it has a narrow focus on the specific tool of a public AMC established to support bank resolution and with the objective of providing insight on the design and operational issues surrounding the creation of such AMCs. It seeks to inform policy makers on issues to consider if and when planning to establish a public AMC through an analysis of recent public AMCs established as a result of the global financial crisis. Detailed case studies in developed and emerging markets over three generations provide a toolkit approach with questions and answers, including questions on design and operations that are critical for authorities confronted with the issue of whether to establish an AMC. An emphasis on how to do it is a practical approach; the toolkit is structured as follows: Part I summarizes the findings on the preconditions, design, and operationalization of public AMCs. Part II provides case studies on three generations of AMCs whose lessons are embedded in Part I. The case studies cover emerging and developed markets and have been selected based on the lessons they offer.

**Cultural Anthropology**

2019-12

From the book's signature toolkit approach to the new chapter on the environment and sustainability to the accompanying videos and interactive learning tools, all aspects of Ken Guest's Cultural Anthropology work together to inspire students to use the tools of anthropology to see the world in a new way and to come to class prepared to have richer, more meaningful discussions about the big issues of our time. Are there more than two genders? How do white people experience race? What defines a family? Is there such a thing as a natural disaster? What causes some people to be wealthy while others live in poverty?

**Bridge the Culture Gaps**

2021-11-11

The essential guide for working in diverse teams and across cultures today. This practical self-help guide will optimize the performance of individuals and teams working in an intercultural environment by increasing awareness of the nature and impact of diversity in the workplace and national cultural differences. It demonstrates how to use the power of difference to achieve positive results for all. Learn how to mitigate unconscious bias to create inclusive organizations and how to use key cultural dimensions to communicate, cooperate, and negotiate across cultures. Addressing the unique challenges of influencing across cultures and managing international transformation projects, this is an indispensable toolkit for competency in business. Leading interculturalist Robert Gibson challenges conventional ideas and makes new connections between culture diversity and neuroscience in this modern guide for anyone working virtually or together in a diverse team or international business. Use these simple and proven approaches for better communication, collaboration, leadership, and decision making in today's globalized workplace.
**ICT for Social Welfare**

2004-05-05

Information and communications technology ICT has the potential to improve services provided by the public and voluntary sectors. Empower staff and strengthen the community. Therefore, it is in the interests of those working in social welfare to understand and grapple with key issues. This book analyses the current context and use of ICT in these sectors and builds on this to provide practical guidance for managers and staff. Assuming no technical knowledge, the book provides the ideas, tools, and resources to think critically and creatively about current ICT practice and to implement positive change at individual, team, and organisational level.

**Managing Conflict of Interest in the Public Sector**

2005

Conflicts of interest in both the public and private sectors have become a major matter of public concern worldwide. The OECD guidelines define a conflict of interest as occurring when a public official has private capacity interests which could improperly influence the performance of their official duties and responsibilities. However, identifying a specific conflict of interest in practice can be difficult and resolving the conflicting interests appropriately in a particular case is something that most people find even more challenging. The toolkit focuses on specific techniques, resources, and strategies for identifying, managing, and preventing conflict of interest situations more effectively and increasing integrity in official decision making. This toolkit provides non-technical practical help to enable officials to recognise problematic situations and help them to ensure that integrity and reputation are not compromised. The tools themselves are provided in generic form, they are based on examples of sound conflict of interest policy and practice drawn from various OECD member and non-member countries. They have been designed for adaptation to suit countries with different legal and administrative systems. Further reading: Managing Conflict of Interest in the Public Service, OECD guidelines and country experiences.

**A Toolkit for Action Research**

2010-11-16

This book facilitates the completion of action research studies by providing a series of tasks that guide action researchers from the beginning of a project and selecting a topic for study to completion of the project and editing final reports. All too often, students and practicing professionals in professional development schools are overwhelmed by the thought of doing an action research project and resort to using quasi-experimental designs. A toolkit for action research puts an end to both with the result being a life long learning and reflection tool for teachers.

**Measuring Performance**

2012-09-28

Do your performance measures seek primarily to detect and control undesirable activities rather than sharing and rewarding productive behaviour? Every organisation needs to measure its performance and that of the people it employs. David Jenkins shows you how to make more productive use of such measures for measures to be accurate and reliable, there are fundamental rules that need to be applied ignoring
or misapplying them undermines performance and impedes the achievement of the corporate goal for any enterprise data must be available across the whole spectrum of activity in which it is engaged the quality of that information will depend on the way it is measured in some commercial organisations data is regularly gathered at local level instead of being used at this point it is often fed into a corporate information system which having recycled it issues the result in a form that does not always meet needs in measuring performance david jenkins examines the more traditional measures of performance and highlights their shortcomings as well as assessing the merits of the alternative approaches that are currently available the book concludes with a step by step guide to reviewing the effectiveness of your organisation s existing systems for measuring performance and identifying ways of improving them
