Vittorio Coda's discussion of the goals and purpose of the business enterprise illuminates the long running debate over the goals of the firm. His conceptualization of the firm and its relationships within society transcends stale arguments over shareholders versus stakeholders by viewing the firm less as an agent of individual interests and more as an engine of social development that unifies the interests of the different participants in articulating a model of the entrepreneurial firm embedded in a social system and a values system based upon notions of fairness and social responsibility. Coda offers an original approach to interpret the business system the view of a socially responsible entrepreneurial business sector surfacing in this book offers an attractive alternative to most of the prevailing models of market capitalism that have attracted criticism over the past decades.

Chromatographic electrophoretic techniques fourth edition volume 1 paper and thin layer chromatography presents the methods of paper and thin layer chromatography. This book discusses the practical approach in the application of paper and thin layer chromatography techniques in the biological sciences. Organized into 18 chapters this edition begins with an overview of the clinical aspects related to the detection of those metabolic diseases that can result in serious illness presenting in infancy and early childhood. This text then discusses the three major types of screening for inherited metabolic disorders in which paper or thin layer chromatography are being used including screening the healthy newborn population, screening the sick hospitalized child, and screening mentally retarded patients. Other chapters consider the procedures for thin layer chromatography. This book discusses as well the complexity of amino acid mixtures present in natural products.
the final chapter deals with the detection of synthetic basic drugs this book is a valuable resource for chemists and toxicologists the value of money by benjamin m anderson published by good press good press publishes a wide range of titles that encompasses every genre from well known classics literary fiction and non fiction to forgotten or yet undiscovered gems of world literature we issue the books that need to be read each good press edition has been meticulously edited and formatted to boost readability for all e readers and devices our goal is to produce ebooks that are user friendly and accessible to everyone in a high quality digital format this book showcases how the latest and most advanced types of analytical modeling and empirical analysis can help to create value in the global supply chain focusing on practical relevance it shares valuable management insights and addresses key issues in operations management om demonstrating how past research has led to various practices and impacts while also exploring the aspirations of the latest research it presents current research on various topics such as global supply chain design service supply chains product design responsible supply chains performance and incentives in operations data analytics in health services new business models in the digital age and new digital technology advances such as blockchain in addition it presents practical case studies on the aforementioned topics beyond the value of its contents the book is intended as a tribute to professor morris cohen who has been a major contributor to advancing the research frontier in operations management and a driving force in shaping the field given its scope the book will appeal to a wide readership from researchers and phd students to practitioners and consultants reprint of the original first published in 1917 handbook of the shapley value contains 24 chapters and a foreword written by alvin e roth who was awarded the nobel memorial prize in economic sciences jointly with lloyd shapley in 2012 the purpose of the book is to highlight a range of relevant insights into the shapley value every chapter has been written to honor lloyd shapley who introduced this fascinating value in 1953 the
first chapter by william thomson places the shapley value in the broader context of the theory of cooperative games and briefly introduces each of the individual contributions to the volume. this is followed by a further contribution from the editors of the volume which serves to introduce the more significant features of the shapley value. the rest of the chapters in the book deal with different theoretical or applied aspects inspired by this interesting value and have been contributed specifically for this volume by leading experts in the area of game theory. chapters 3 through to 10 are more focused on theoretical aspects of the shapley value. chapters 11 to 15 are related to both theoretical and applied areas. finally, from chapter 16 to chapter 24, more attention is paid to applications of the shapley value to different problems encountered across a diverse range of fields as expressed by william thomson in the introduction to the book. the chapters contribute to the subject in several dimensions: mathematical foundations, axiomatic foundations, computations, applications to special classes of games, power indices, applications to enriched classes of games, applications to concretely specified allocation problems, an ever-widening range mapping allocation problems into games, or implementation. nowadays the shapley value continues to be as appealing as when it was first introduced in 1953 or perhaps even more so, now that its potential is supported by the quantity and quality of the available results. this volume collects a large amount of work that definitively demonstrates that the shapley value provides answers and solutions to a wide variety of problems. after the ips2 conferences in cranfield and linköping in 2009 and 2010, the 3rd cirp international conference on industrial product service systems ips2 2011 takes place in braunschweig, germany. ips2 itself is defined as an integrated industrial product and service offering that delivers value in use. the customers expect comprehensive solutions which are adapted to their individual needs. ips2 offers the possibility to stand out from competition and for long term customer loyalty, particularly in times of economic crisis. it becomes apparent which producing companies understand to
satisfy the needs and requirements of their customers especially in this relatively new domain IPS2 it will be important to keep track of the whole context and to seek cooperation with other research fields and disciplines the 3rd CIRP International Conference on Industrial Product Service Systems IPS2 2011 serves as a platform for such collaborations and the discussion of new scientific ideas this volume contains new papers on foundational issues in epistemology ethics and political philosophy drawing on extensive fieldwork in Havana's secondary schools Cuban youth and revolutionary values is a remarkable ethnography charting the government's attempts to transform a future generation of citizens while Cuba's high literacy rate is often lauded the little known dropout rates among teenagers receive less scrutiny in vivid succinct reporting educational anthropologist Denise Blum now shares her findings regarding this overlooked aspect of the Castro legacy despite the fact that primary school enrollment rates exceed those of the United States the reverse is true for the crucial years between elementary school and college after providing a history of Fidel Castro's educational revolution begun in 1953 Denise Blum delivers a close examination of the effects of the program which was designed to produce a society motivated by benevolence rather than materialism exploring pioneering pedagogy the notion of civic education and the rural components of the program Cuban youth and revolutionary values brims with surprising findings about one of the most intriguing social experiments in recent history examining urban heritage in twentieth century Australia James Lesh reveals how evolving ideas of value and significance shaped cities and places over decades a growing number of sites and areas were found to be valuable by communities and professionals places perceived to have value were often conserved places perceived to lack value became subject to modernisation redevelopment and renewal from the 1970s alongside strengthened activism and legislation with the innovative Burra Charter 1979 the values based model emerged for managing the aesthetic historic scientific and social
significance of historic environments values thus transitioned from an implicit to an overt component of urban architectural and planning conservation the field of conservation became a noted profession and discipline conservation also had a broader role in celebrating the australian nation and in reconciling settler colonialism for the twentieth century integrating urban history and heritage studies this book provides the first longitudinal study of the twentieth century australian heritage movement it advocates for innovative and reflexive modes of heritage practice responsive to urban social and environmental imperatives as the values based model continues to shape conservation worldwide this book is an essential reference for researchers students and practitioners concerned with the past and future of cities and heritage the foreword and chapter 1 introduction of this book are available for free in pdf format as open access from the individual product page at routledge com it has been made available under a creative commons attribution non commercial no derivatives 4 0 license this book explores the nature of values and the status of value studies at the turn of the millennium the contributors nineteen philosophers from fourteen countries introduce and defend an enriching variety of views regarding the present state and future prospects of value inquiry bringing together leading conservation scholars and professionals from around the world this volume offers a timely look at values based approaches to heritage management over the last fifty years conservation professionals have confronted increasingly complex political economic and cultural dynamics this volume with contributions by leading international practitioners and scholars reviews how values based methods have come to influence conservation takes stock of emerging approaches to values in heritage practice and policy identifies common challenges and related spheres of knowledge and proposes specific areas in which the development of new approaches and future research may help advance the field the free online edition of this open access book is available at getty edu publications heritagemanagement and includes zoomable

downloads of the book this book is devoted to a systems
theoretical presentation of the main results of applying the
systemic yoyo model and relevant analytical tools to the topics
of money and financial institutions the author presents the
main concepts and results of the subject matter in the
language of systems science which has in the past century
prompted revolutionary applications of systems research in
various subfields of traditional disciplines this volume applies a
brand new logic of reasoning to some of the unsettled
problems in the area of money and banking due to the
particular systemic approach employed the reader will be able
to see how different economic activities are implicitly related
to each other and how financial decisions are holistically made
in reference to seemingly unrelated events that is the learning
of this particular subject matter takes place at a different more
elevated level from which among others economies are
respectively seen as both closed and open systems their
interactions emulate those of rotational pools of fluids this
book can be used as a textbook for researchers and graduate
students in economics finance systems science and
mathematical systems modeling it will also be useful as a
reference book for applied economists and various policy
makers coaches play a major role in helping people understand
their values and the values of their surroundings and helping
them make choices and adapt sometimes the choice may be to
find a situation more in sync with your values or it may mean
working hard on yourself or in concert with your partner team
or organization whatever we need to do to attain it a positive
fit makes for a happier person and a happier person will be
more successful this accessible and practical book will help
coaches educators leaders and managers understand the
philosophy methodology and tools that can be used to make a
person happier healthier and more productive at work and in
life in general this book compiles short vignettes from over a
dozen global academics and celebrated executive coaches
sharing information about aligning values in different settings
based on years of research and written for readers from all walks of life you will learn that when you understand your core values place them on a triaxial template and align them with your definition of success everything changes it will help you come out of your comfort zone in order to embrace the future and enhance the quality of your life for this you need a concept a methodology and effective tools all of which are offered in this book rich with practical step by step methodologies and tools to facilitate values led leadership coaching and mentoring this book is essential for any change agent be it a coach a leader an educator or any person who is interested in learning how to become more effective improve their practice and engage in self or professional coaching at the same time it will enhance leadership qualities a simulation model was developed to estimate postfire changes in the production and value of grazing lands in the northern rocky mountain intermountain region ecological information and management decisions were used to simulate expected changes in production and value after wildfire in six major rangeland types permanent forested range ponderosa pine transitory range douglas fir larch lodgepole pine western white pine mountain grassland sagebrush pinyon juniper and western hardwoods changes varied widely in quantity and duration among the range types the largest decrease in net value was calculated for mountain grassland 7 acre for a 2 year period the largest increase in net value was calculated for a ponderosa pine sawtimber stand with 100 percent basal area removal 36 acre for a 150 year period the estimates calculated in this study should be useful in land and fire management planning in the northern rocky mountain intermountain area supply chain management scm strives for creating competitive advantage and value for customers by integrating business processes from end users through original suppliers however the question of how scm influences the value of a firm is not fully answered various conceptual frameworks that explain the coherence of scm and company value comprehended as value based scm are well accepted in scientific research but quantitative approaches to
value based scm are found rather seldom the book contributes to this research gap by proposing quantitative models that allow for assessing influences of scm on the value of a firm opposed to existing models that limit the observation to chosen facets of scm or selected value drivers this holistic approach is adequate to reflect configurational and operational aspects of scm cover all phases of the product life cycle financially compare value impacts of profitability related and asset related value drivers and assess influences of dynamics and uncertainties on company value understanding the capacity of food systems to undertake a transformation towards sustainability requires understanding how resources stream in and out of the systems as complex socio economic structures food and agricultural value chains are important means for channeling resources knowledge and agency in and out of rural areas given their prominent role on the development agendas there is mixed evidence as to what extent value chains and their actors can contribute to improving the livelihoods in poor rural and urban areas in order to shape sustainable living places transformative capacities and good governance are important mainstays transformative agri food value chains are robust and often act as the sole transmission belt for returning capital resources and identity back into vulnerable areas moreover domestic or regional chains may provide urban consumers with fresh quality food that also contributes to regional identity responsible management of shifts in work modes values for post pandemic sustainability volume 2 explores ethical leadership people management resilience and the management of consequences for business and healthcare systems this text focuses upon an array of key concepts historically associated with the activities of the helping professions but including thematic explorations of poverty inequality user perspectives and of the essential components of the helping relationship such as empathy compassion and conviction values those intangible guideposts serve as standards and perceptual screens which assist us in selecting our priorities for reflection and action our quest is to clarify
compare and form values expressed in defensible and consistent value judgements and actions laser techniques offer possibilities for the examination and conservation of artwork and for the prevention of cultural heritage. This collection of peer-reviewed papers from the 8th International Conference on Lasers in the Conservation of Artworks, Sibiu, Romania, September 21-25, 2009, addresses various aspects of cultural heritage preservation. Sustainable shareholder value is a main strategic objective for financial institutions. This text provides an analytical assessment of shareholder value creation, providing a framework for analyzing theory and presenting empirical investigations. It analyzes the importance of drivers in creating value and develops a new measure of bank efficiency buried in paper as new technologies, threats of litigation, and the onslaught of e-business innovations change the very nature of work. Organizations need ways to safely and properly manage information. This revised and expanded edition of Sampson's earlier classic shows how records and information management practices jointly contribute to an organization's financial well-being. Be it public or private, non- or for-profit, recordkeeping practices affect business objectives, processes, functions, and ultimately everyone in the organization. This book covers recordkeeping in all media, including paper, microfilm, electronic, and other storage modes. Instead of focusing on records media and information technologies, Sampson shows why organizations must focus on the content and value of records as they are determined by the organization's operating needs, the government's requirements, and relevant legislation. She shows how to create an essential uniformity in records management, one that integrates the many media systems you use into a single master system also included is a cautionary section explaining why skillful records and information management is essential to safeguard an organization's legal rights. This book provides fresh management perspectives and new business strategies showing how to cope with the growing dependence on electronic records.
as well as to provide some key global strategies that can help coping with those global challenges such as collaboration strategic value chain planning and interdependency analyses it presents literature reviews strategic research orientations assessment of some current key issues and state of the art methodologies anticipating that marketing will experience a strategic change in the new normal post covid 19 this book sets out to capture interesting insights from researchers and practitioners through in depth research on the myriad aspects of industrial transformation it discusses the facets in which markets can be reached sustainably delivering value to people planet and create prosperity sustainable marketing and customer value establishes an overview and framework for major ideas that connect marketing consumption and sustainability it addresses dominant areas of research of sustainability from the marketing perspective the origin of interest in sustainability as well as the practice of deprivitising sustainability ideas in pursuit of short term business goals research scholars and business students will find this book of primary relevance but it is also written for marketing academics and professionals especially those in large corporations it appears that we live in an age of disasters the mighty mississippi and Missouri flood millions of acres earthquakes hit tokyo and California airplanes crash due to mechanical failure and the seemingly ever increasing wind speeds make the storms more and more frightening while all these may seem to be unexpected phenomena to the man on the street they are actually happening according to well defined rules of science known as extreme value theory we know that records must be broken in the future so if a flood design is based on the worst case of the past then we are not really prepared against floods materials will fail due to fatigue so if the body of an aircraft looks fine to the naked eye it might still suddenly fail if the aircraft has been in operation over an extended period of time our theory has by now penetrated the social sciences the medical profession economics and even astronomy we believe that our field has come of age in or er to
fully utilize the great progress in the theory of extremes and its ever increasing acceptance in practice an international conference was organized in which equal weight was given to theory and practice this book is volume i of the proceedings of this conference in selecting the papers for volume lour guide was to have authoritative works with a large variety of coverage of both theory and practice reproduction of the original color value by c r clifford questions from top schools since 2003 complete answer keys topical order to facilitate drilling complete and true encyclopedia of question types comprehensive trick questions revealed tendency towards carelessness is greatly reduced complete edition and concise edition ebooks available predatory value extraction explains how an ideology of corporate resource allocation known as maximizing shareholder value msv that emerged in the 1980s came to dominate strategic thinking in business schools and corporate boardrooms in the united states undermining the social foundations of sustainable prosperity it resulted in employment instability income inequity and slow productivity growth in explaining what happened to sustainable prosperity william lazonick and jang sup shin focus on the growing imbalance between value creation and value extraction in the u s economy and the corporate governance institutions that determine this balance in the nation s major business corporations the imbalance has become so extreme that predatory value extraction is now a central economic activity to the point at which the u s economy as a whole can be aptly described as a value extracting economy balancing the contributions of economic actors to value creation with their power to extract value provides the foundation for stable and equitable economic growth when certain economic actors are able to assert their power to extract far more value than they contribute to the value creation process an imbalance occurs which when extreme leads to dire economic political and social consequences this book not only explores these consequences but also sets out an agenda for restoring sustainable prosperity
Entrepreneurial Values and Strategic Management 2010-10-20

Vittorio Coda's discussion of the goals and purpose of the business enterprise illuminates the long running debate over the goals of the firm. His conceptualization of the firm and its relationships within society transcends stale arguments over shareholders versus stakeholders by viewing the firm less as an agent of individual interests and more as an engine of social development that unifies the interests of the different participants in articulating a model of the entrepreneurial firm embedded in a social system and a values system based upon notions of fairness and social responsibility. Coda offers an original approach to interpret the business system, the view of a socially responsible entrepreneurial business sector surfacing in this book, offers an attractive alternative to most of the prevailing models of market capitalism that have attracted criticism over the past decades.

coaches play a major role in helping people understand their
values and the values of their surroundings and helping them make
choices and adapt sometimes the choice may be to find a situation
more in sync with your values or it may mean working hard on
yourself or in concert with your partner team or organization
whatever we need to do to attain it a positive fit makes for a
happier person and a happier person will be more successful this
accessible and practical book will help coaches educators leaders
and managers understand the philosophy methodology and tools
that can be used to make a person happier healthier and more
productive at work and in life in general this book compiles short
vignettes from over a dozen global academics and celebrated
executive coaches sharing information about aligning values in
different settings based on years of research and written for
readers from all walks of life you will learn that when you
understand your core values place them on a triaxial template and
align them with your definition of success everything changes it will
help you come out of your comfort zone in order to embrace the
future and enhance the quality of your life for this you need a
concept a methodology and effective tools all of which are offered
in this book rich with practical step by step methodologies and
tools to facilitate values led leadership coaching and mentoring this
book is essential for any change agent be it a coach a leader an
educator or any person who is interested in learning how to
become more effective improve their practice and engage in self or
professional coaching at the same time it will enhance leadership qualities

Cuban Youth and Revolutionary Values
2011-01-15

a simulation model was developed to estimate postfire changes in the production and value of grazing lands in the northern rocky mountain intermountain region ecological information and management decisions were used to simulate expected changes in production and value after wildfire in six major rangeland types permanent forested range ponderosa pine transitory range douglas fir larch lodgepole pine western white pine mountain grassland sagebrush pinyon juniper and western hardwoods changes varied widely in quantity and duration among the range types the largest decrease in net value was calculated for mountain grassland 7 acre for a 2 year period the largest increase in net value was calculated for a ponderosa pine sawtimber stand with 100 percent basal area removal 36 acre for a 150 year period the estimates calculated in this study should be useful in land and fire management planning in the northern rocky mountain intermountain area

Values in Cities 2022-09-23

supply chain management scm strives for creating competitive advantage and value for customers by integrating business processes from end users through original suppliers however the question of how scm influences the value of a firm is not fully
answered various conceptual frameworks that explain the coherence of SCM and company value comprehended as value based SCM are well accepted in scientific research but quantitative approaches to value based SCM are found rather seldom the book contributes to this research gap by proposing quantitative models that allow for assessing influences of SCM on the value of a firm opposed to existing models that limit the observation to chosen facets of SCM or selected value drivers this holistic approach is adequate to reflect configurational and operational aspects of SCM cover all phases of the product life cycle financially compare value impacts of profitability related and asset related value drivers and assess influences of dynamics and uncertainties on company value

The Future of Value Inquiry 2021-12-28

understanding the capacity of food systems to undertake a transformation towards sustainability requires understanding how resources stream in and out of the systems as complex socio economic structures food and agricultural value chains are important means for channeling resources knowledge and agency in and out of rural areas given their prominent role on the development agendas there is mixed evidence as to what extent value chains and their actors can contribute to improving the livelihoods in poor rural and urban areas in order to shape sustainable living places transformative capacities and good governance are important mainstays transformative agri food value chains are robust and often act as the sole transmission belt for returning capital resources and identity back into vulnerable areas moreover domestic or regional chains may provide urban consumers with fresh quality food that also contributes to regional
Values in Heritage Management 2019-12-03

responsible management of shifts in work modes values for post pandemic sustainability volume 2 explores ethical leadership people management resilience and the management of consequences for business and healthcare systems

A Systems Perspective on Financial Systems 2014-03-03

this text focuses upon an array of key concepts historically associated with the activities of the helping professions but including thematic explorations of poverty inequality user perspectives and of the essential components of the helping relationship such as empathy compassion and conviction

The Secret of Coaching and Leading by Values 2020-06-07

values those intangible guideposts serve as standards and perceptual screens which assist us in selecting our priorities for reflection and action our quest is to clarify compare and form values expressed in defensible and consistent value judgements and actions
Estimating Postfire Changes in Production and Value of Northern Rocky Mountain-Intermountain Rangelands 1984

Laser techniques offer possibilities for the examination and conservation of artwork and for the prevention of cultural heritage. This collection of peer-reviewed papers from the 8th International Conference on Lasers in the Conservation of Artworks, Sibiu, Romania, September 21-25, 2009, addresses various aspects of cultural heritage preservation.

Science and Stewardship to Protect and Sustain Wilderness Values 2003

Sustainable shareholder value is a main strategic objective for financial institutions. This text provides an analytical assessment of shareholder value creation, providing a framework for analyzing theory and presenting empirical investigations. It analyzes the importance of drivers in creating value and develops a new measure of bank efficiency.

Actions, Norms, Values 2011-04-20

Buried in paper as new technologies, threats of litigation, and the onslaught of e-business innovations change the very nature of work, organizations need ways to safely and properly manage...
information this revised and expanded edition of sampson s earlier classic shows how records and information management practices jointly contribute to an organization s financial well being be it public or private non or for profit recordkeeping practices affect business objectives processes functions and ultimately everyone in the organization this book covers recordkeeping in all media including paper microfilm electronic and other storage modes instead of focusing on records media and information technologies sampson shows why organizations must focus on the content and value of records as they are determined by the organization s operating needs the government s requirements and relevant legislation she shows how to create an essential uniformity in records management one that integrates the many media systems you use into a single master system also included is a cautionary section explaining why skillful records and information management is essential to safeguard an organization s legal rights this book provides fresh management perspectives and new business strategies showing how to cope with the growing dependence on electronic records

Quantitative Models for Value-Based Supply Chain Management 2012-10-25

this book provides a global perspective on the various issues that the industry has to face as well as to provide some key global strategies that can help coping with those global challenges such as collaboration strategic value chain planning and interdependency analyses it presents literature reviews strategic research orientations assessment of some current key issues and state of the art methodologies
anticipating that marketing will experience a strategic change in the new normal post covid 19 this book sets out to capture interesting insights from researchers and practitioners through in depth research on the myriad aspects of industrial transformation it discusses the facets in which markets can be reached sustainably delivering value to people planet and create prosperity sustainable marketing and customer value establishes an overview and framework for major ideas that connect marketing consumption and sustainability it addresses dominant areas of research of sustainability from the marketing perspective the origin of interest in sustainability as well as the practice of deprioritising sustainability ideas in pursuit of short term business goals research scholars and business students will find this book of primary relevance but it is also written for marketing academics and professionals especially those in large corporations

Transformative Food Value Chains for Local Development 2024-01-26

it appears that we live in an age of disasters the mighty missis sippi and missouri flood millions of acres earthquakes hit tokyo and california airplanes crash due to mechanical failure and the seemingly ever increasing wind speeds make the storms more and more frightening while all these may seem to be unexpected phenomena to the man on the street they are actually happening according to well defined rules of science known as extreme value theory we know that records must be broken in the future so if a flood design is based on the worst case of the past then we are not really prepared against floods materials will fail due to fatigue so if
the body of an aircraft looks fine to the naked eye it might still suddenly fail if the aircraft has been in operation over an extended period of time our theory has by now penetrated the social sciences the medical profession economics and even astronomy we believe that our field has come of age in order to fully utilize the great progress in the theory of extremes and its ever increasing acceptance in practice an international conference was organized in which equal weight was given to theory and practice this book is volume i of the proceedings of this conference in selecting the papers for volume our guide was to have authoritative works with a large variety of coverage of both theory and practice

The Value Base Of Social Work And Social Care 2008-10-01

questions from top schools since 2003 complete answer keys topical order to facilitate drilling complete and true encyclopedia of question types comprehensive trick questions revealed tendency towards carelessness is greatly reduced complete edition and concise edition ebooks available
predatory value extraction explains how an ideology of corporate resource allocation known as maximizing shareholder value (MSV) that emerged in the 1980s came to dominate strategic thinking in business schools and corporate boardrooms in the United States, undermining the social foundations of sustainable prosperity. It resulted in employment instability, income inequity, and slow productivity growth. In explaining what happened to sustainable prosperity, William Lazonick and Jang Sup Shin focus on the growing imbalance between value creation and value extraction in the U.S. economy and the corporate governance institutions that determine this balance. In the nation's major business corporations, the imbalance has become so extreme that predatory value extraction is now a central economic activity to the point at which the U.S. economy as a whole can be aptly described as a value-extracting economy. Balancing the contributions of economic actors to value creation with their power to extract value provides the foundation for stable and equitable economic growth. When certain economic actors are able to assert their power to extract far more value than they contribute to the value creation process, an imbalance occurs, which when extreme leads to dire economic, political, and social consequences. This book not only explores these consequences but also sets out an agenda for restoring sustainable prosperity.
