when the united states entered world war i in april 1917 the clamoring in the press for a strong army largely overshadowed the need for considerable naval contributions to the war effort although it was small at the time the u s navy transported thousands of doughboys to france all the while battling the predatory german u boats henry ford tried to put his mass production techniques to work to produce hundreds of submarine chasers to patrol american coastlines the fledgling naval air service was assigned the daunting task of dealing with enemy aircraft over france and in the adriatic sea this is the personal account of men who served on the sea and in the air as well as the captains of industry who made victory possible industrial innovations contributed greatly to the allied cause george eastman s kodak company developed ship and aircraft camouflage and the general electric company perfected the hydrophone a precursor to modern sonar while many are
aware of the exploits of Eddie Rickenbacker the U.S. Army's ace few know that the Navy also had an ace after more than 80 years these forgotten naval heroes receive the recognition that they well deserve in an account that attempts to give the war a human face through personal diaries letters and photographs

a meticulous exploration of one of the most important years in american history the d day invasion launched on june 6 1944 is widely referred to as the longest day of world war two historian victor brooks argues that 1944 was in effect the longest year for americans of that era both in terms of casualties and in deciding the outcome of war itself brooks also argues that only the particular war events of 1944 could have produced the reshuffling of the cards of life that in essence changed the rules for most of the 140 million americans in some fashion rather than focusing
on military battles and strategy alone the author chronicles the year as a microcosm of disparate military political and civilian events that came together to define a specific moment in time as war was raging in europe americans on the home front continued to cope with some prospering as us forces launched an offensive against the japanese in the mariana islands and palau folks at home enjoyed morale boosting movies and songs such as to have and have not and g i jive and as american troops invaded the island of leyte launching the largest naval battle during the war president franklin d roosevelt and thomas e dewey were in the home stretch leading up to the election of 1944 it has been said that the arc of history is long throughout american history however some years have been truly momentous the longest year makes the case that 1944 was one such year skyhorse publishing as well as our arcade imprint are proud to publish a broad range of books for readers interested in history books about world war ii the third reich hitler and his henchmen the jfk assassination conspiracies the american civil war the american revolution gladiators vikings ancient rome medieval times the old west and much more while not every title we publish becomes a new york times bestseller or a national bestseller we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home

this unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day relying on written records from as far back as 2400 bce and using sources ranging from the bible to security council resolutions the author pieces together the history of a subject which is almost as old as civilisation itself the author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and ascribing rules to them protecting civilians who are either inadvertently or intentionally caught up between them and controlling the use of particular classes of weapons that may be used in times of conflict thus it is that this work is divided into three substantial parts volume 1 on the laws affecting combatants and captives volume 2 on civilians and volume 3 on the law of arms control this second book on civilians examines four different topics the first topic deals with the targeting of civilians in times of war this discussion is one which has been largely governed by the developments of technologies which have allowed projectiles to be discharged over ever greater areas and attempts to prevent their indiscriminate utilisation have struggled to keep pace the second topic concerns the destruction of the natural environment with particular regard to the utilisation of starvation as a method of warfare and unlike the first topic this one has rarely changed over thousands of years although contemporary practices are beginning to
represent a clear break from tradition the third topic is concerned with the long standing problems of civilians under the occupation of opposing military forces where the practices of genocide collective punishments and or reprisals and rape have occurred the final topic in this volume is about the theft or destruction of the property of the enemy in terms of either pillage or the intentional devastation of the cultural property of the opposition as a work of reference this set of three books is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare it also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

this volume originally published in 1987 fills a gap in a neglected area looking at the entire war in the mediterrean the volume examines the war from the viewpoint of all the important participants making full use of archives and manuscript collections in britain france italy germany austria and the united states a fascinating mosaic of campaigns emerges in the adriatic straits of otranto and the eastern aegean the german assistance to the tribes of libya the threat that germany would get her hands on the russian black sea fleet and use it in the mediterreanean and the appearance and influence of the americans in 1918 all took place against a background of rivalry between the allies which frustrated the appointment of jellicoe in 1918 as supreme command at sea in a role similar to that of foch on land

a dramatic and tragic episode in British military history that will soon not be part of living memory. More than 100,000 British troops fought in Korea between 1950 and 1953 of which just over 1,000 died with a further 1,000 captured and held in atrocious conditions by the Chinese and North Koreans. At least half of those captured died in prison camps. More than 70% of those who fought were teenagers doing national service poorly trained and ill equipped. The Korean War Memories of Forgotten British Heroes tells the story of these men in their own words. Most of the veterans are now advanced in age and there is a pressing need for them to tell their tale so soon after the Second World War this was a conflict Britain did not need but she remained steadfast by the side of the Americans. Fighting more than 6,000 miles away in a country barely anyone could point to on a map yet while we remember those conflicts in the Falklands, Iraq, and Afghanistan, the Korean War remains largely forgotten.

Most accounts of Canada and the First World War either ignore or merely mention in passing the churches' experience. Such neglect does not do justice to the remarkable influence of the wartime churches nor to the religious identity of the young Dominion. The churches' support for the war was often wholehearted but just as often nuanced and critical. Shaped by either the classic just war paradigm or pacifism's outright rejection of violence, the war heightened issues of Canadianization, attitudes to violence, and ministry to the bereaved and the disillusioned. It also exacerbated ethnic tensions within and between denominations and challenged notions of national and imperial identity. The authors of this volume provide a detailed summary of various Christian traditions and the war both synthesizing and furthering previous research in addition to examining the experience of Roman Catholics, English and French-speaking Anglicans, Presbyterians, Methodists, Baptists, Lutherans, Mennonites, and Quakers. There are chapters on precedents formed during the South African War, the work of military chaplains, and the roles of church women on the home front.

The Ethics of War and Peace

In the late 1930s, a number of American women, especially those allied with various peace and isolationist groups, protested against the nation's entry into World War II while their story is fairly well known. Margaret Paton Walsh reveals a far less familiar story of women who fervently felt that American intervention was absolutely necessary. Paton Walsh recounts how the United States became involved in the war but does so through the eyes of American women who faced it as a necessary evil. Covering the period between 1935 and 1941, she examines how these women functioned as political actors even though they were excluded from positions of power through activism in women's organizations, informal women's networks, and even male-dominated lobbying groups in the great debate over whether America should enter the war. Some women favored aid to the allies not because they hoped for war but because they hoped aid would forestall more direct U.S.
involvement but also because they believed war was preferable to a nazi victory paton walsh shows that this activism involved some of the most prominent women of their day elizabeth cutter morrow whose son in law charles lindbergh was an isolationist spokesman supported the revision of the neutrality acts to allow the sale of arms to the allies and expressed her support in a national radio broadcast soon other women joined this debate esther brunauer of the aauw journalist dorothy thompson and organizations like the league of women voters and national women s trade union league broke from the pacifist tradition to advocate american aid for the allied cause focusing on the conflict in europe paton walsh shows how these women grasped the implications of the lend lease program for america s entry into the war but supported it nevertheless by late 1941 the women s division of the fight for freedom committee had been established no longer merely advocating aid to britain to keep american boys out of battle this organization supported direct american involvement in the war as a means of stopping nazi oppression while most historians have focused on women s pacifism paton walsh connects women more directly to world events and shows how those interventionists reformulated maternalist ideas to justify and explain their beliefs our war too is a story of american women trying to reconcile the irreconcilable to preserve both their principles and their peace it expands our understanding of women as political actors and thinkers about foreign policy as it sheds new light on american public opinion over the build up to the war
