students and scholars of taiwan s politics and civil society but also to readers with an interest in small parties and particularly environmental parties and
movements in 2014 the global economic system celebrates two anniversaries seventy years ago on 22 july 1944 at brenton woods new hampshire the articles of
agreement of the international monetary fund imf and the articles of agreement of the international bank for reconstruction and development worldbank were
adopted since then the global financial and monetary system underwent significant policy changes but the institutional framework remained the same more
recently twenty years ago on 15 april 1994 the final act of the uruguay round of multilateral trade negotiations was signed and its key component the agreement
establishing the world trade organization entered into force on 1 january 1995 even though the beginning of the multilateral trading system dates back to the late
1940s the founding of the wto constitutes a significant institutional reform which marks the beginning of a new era anniversaries are usually moments of
celebration however even a superficial observer will notice that neither the current international financial and monetary regime nor the international trade regime
is in a stage which invites celebration instead both are facing difficult and fundamental challenges to their very existence from the outside but also from within so
while there may be no time to celebrate anniversaries are also often used for reflection about the past and the future hence eyiel 5 2014 considers these two
anniversaries ample moments to reflect on the legacy and the current status of the main two pillars of international economic law in its part one part two of eyiel

grammar teaching and learning english grammar is the second volume in the global research on teaching and learning english series co published by routledge and tif in the spring of 2014 the sunflower movement s three week occupation of the legislative yuan brought taiwan back to international media attention it was the culmination of a series of social movements that had been growing in strength since 2008 and have become even more salient since the spring of 2014 social movements in taiwan have emerged as a powerful new actor that needs to be understood alongside those players that have dominated the literature such as political parties local factions taishang china and the united states this book offers readers an introduction to the development of these social movements in taiwan by examining a number of important movement case studies that focus on the post 2008 period the return of the kuomintang kmt to power radically changed the political environment for taiwan s civil society and so the book considers how social activists responded to this new political opportunity structure the case chapters are based on extensive fieldwork and are written by authors from a variety of disciplinary backgrounds and methodological approaches in some cases authors combine being both academics and activists themselves together the chapters focus on a number of core issues providing the book with four key aims firstly it investigates the roots of the movements and considers how to best explain their emergence Secondly it examines the development trajectories of these movements thirdly it looks at the best way to explain their impact and development patterns and finally it assesses their overall impact questioning whether they can be regarded as successes or failures covering a unique range of social movement cases the book will be of interest to students and researchers interested in taiwanese society and politics as well as social movements and civil developmental context over the past several years notions of developmental trajectories particularly criminal trajectories have taken hold as important areas of investigation for researchers interested in the longitudinal study of crime this accessible volume presents the first full length overview of criminal trajectories as a concept and methodology and makes the case for a developmental approach to the topic the volume shows how a developmental perspective is important from a practical standpoint helping to inform the design of prevention and early intervention programs to forestall the onset of antisocial and criminal activity particularly when it begins in childhood crime in this view does not suit a one size fits all model there are different types of criminals who develop as the result of different types of developmental factors and experiences by considering what risk factors may set the stage for later crimes in certain circumstances the authors argue that we may be able to intervene at any point along the life course and if addressed early enough prevent criminal behavior from taking root criminal trajectories offers a comprehensive synthesis of the findings from numerous criminal trajectory studies presented through a multi disciplinary lens it addresses the policy and practice implications of these findings for the criminal justice system including a critique of current sentencing and incarceration practices and presents twelve recommendations informed by developmental frameworks for future work for a greener world presents a structured discussion on how to measure the economic and financial dimensions of climate change it combines economic theory and analysis with real world examples of how climate data can be constructed for different country settings based on existing climate science and economic data the book identifies important climate data gaps as well as practical and innovative approaches to close many of these gaps the book discusses how to track greenhouse gas emission by production and consumption chapters 1 2 which lead to physical risks chapters 3 4 and transition risks chapters 5 7 and concludes with cross border implications of climate risks chapters 8 9 the book also showcases a collaboration of seven international organizations european central bank eurostat international energy agency international monetary fund organisation for economic cooperation and development world bank and world trade organization chapter contributions come from leading practitioners and experts in the fields of energy and climate change issues this volume also serves as a reference guide for the imf s climate change indicators dashboard and future research in this area this book is an invitation to delve into the world of game based learning to understand the many facets that make games a truly interesting and effective tool to teach and train in the 21st century it includes nine chapters which were initially presented at the igbl conference a conference held throughout ireland where researchers practitioners students and other stakeholders meet and share their interest in games and education these chapters touch on some very important topics including games for health formal education poetry and games science teaching through mobile games relaxation with gaming devices and accounting for disabilities with handheld devices together these chapters illustrate the advancements in the field of game based learning the challenges faced by developers and educators as well as the opportunities that this medium can offer each chapter is written with practicality in mind in an effort to provide the reader with both a solid theoretical approach and background coupled to some practical guidelines and suggestions that can be applied easily this groundbreaking resource presents a wealth of findings and
perspectives previously unseen in the LGBT literature. Its focus on psychological, sociopolitical, and care delivery issues affecting LGBT elders reveals both the nuanced interplay between diverse sources of identity and multiple sources of stigma and discrimination. Specific chapters highlight challenges and resiliences impacting subpopulations, such as racial groups, veterans, immigrants, examining employment and advocacy issues. Discuss later life concerns in context and offer guidelines for relevant ethical practice. Contributors represent a wide range of fields from psychiatry, gerontology, public health, and social work, highlighting the scope and needs of this diverse and complex population among the topics in the handbook. Family relationships of older LGBT adults, the intersection of identities, race, age, sexuality, and care. Network bisexuality is an invisible community among LGBT elders, implications of the Supreme Court ruling on same-sex marriage. No money, no work, and you're old disabilities among LGBT elders, responses of medicine, public health, rehabilitation, and social work. Handbook of LGBT elders is an essential reference for mental health professionals, psychologists, and social workers who work with the LGBT community. The book is organized around issues that researchers interested in the LGBT community and aging. The volume represents presentations given at the 86th annual meeting of the Psychometric Society held virtually on July 19-23, 2021. About 500 individuals contributed paper presentations, symposia, poster presentations, pre-conference workshops, keynote presentations, and invited presentations. Since the 77th meeting, Springer has published the conference proceedings volume from this annual meeting. To allow presenters to share their work and ideas with the wider research community while still undergoing a thorough review process, this proceedings covers a diverse set of psychometric topics including item response theory, Bayesian models, reliability, longitudinal measures, and cognitive diagnostic models. The book brings together twelve original contributions by leading scholars on the much-debated issues of what is free will and how we exercise it in a world governed by laws of nature. It challenges perceptions of the laws of nature in relation to whether they may or may not be game changers in how we think about both free will and the laws of nature. The volume presents the views of a range of international experts on these issues and aims at providing the reader with novel approaches.
philosophy the target audience is composed by academics and scholars who are interested in an original and contemporary approach to these long debated issues. Millions of parents with children in public schools can't believe they're asking this question, but they are, and you should be asking it too. Almost overnight America's public schools have become morally toxic and they are especially poisonous for the hearts and minds of children from religious families of every faith. Ordinary families who value traditional morality and plain old common sense parents first duty is to their children to their intellect, their character, their souls. The facts on the ground point to one conclusion get out now! One of the most interesting debates in moral philosophy revolves around the significance of empirical moral psychology for moral philosophy. Genealogical arguments that rely on empirical findings about the origins of moral beliefs so-called debunking arguments take center stage in this debate looking at debunking arguments based on evidence from evolutionary moral psychology, experimental ethics, and neuroscience. This book explores what ethicists can learn from the science of morality, and what they cannot, among other things. The book offers a new take on the deontology-utilitarianism debate. Discusses the usefulness of experiments in ethics. Investigates whether morality should be thought of as a problem-solving device. Shows how debunking arguments can tell us something about the structure of philosophical debate and argues that debunking arguments lead to both moral and prudential skepticism. Presenting a new picture of the relationship between empirical moral psychology and moral philosophy this book is essential reading for moral philosophers and moral psychologists alike. This book analyzes the specifics of corporate governance of China's state-owned enterprises, SOEs, and their assessment under EU merger control which is reflected in the EU Commission's screening of the notified economic concentrations guided by the going global policy and the belt and road initiative. Chinese SOEs have expanded their global presence considerably driven by the need to acquire cutting-edge technologies and other industrial policy considerations. Chinese SOEs have engaged in a series of corporate acquisitions in Europe. The main objective of this book is to demonstrate the conceptual and regulatory challenges of applying traditional merger assessment tools in cases involving Chinese SOEs due to the specifics in their corporate governance and the regulatory framework under which they operate in China. The book also explores the connection between the challenges experienced by the merger control regimes in the EU and the recent introduction of the EU foreign direct investment screening framework. Followed by a proposal concerning foreign subsidies. The book will be a useful guide for academics and researchers in the fields of law international relations, political science, and political economy. Legal practitioners dealing with cross-border mergers and acquisitions, national competition authorities, and other public bodies carrying out merger control policy makers, government officials, and diplomats in China and the EU engaged in bilateral economic relations. an important contribution to the emerging body of research based knowledge about English grammar, this volume presents empirical studies along with syntheses and overviews of previous and ongoing work on the teaching and learning of grammar for learners of English as a second foreign language. It explores a variety of approaches including form-focused instruction, content and language integration, corpus-based lexicogrammatical approaches, and social perspectives on grammar instruction. Nine chapter authors are priority research grant or doctoral dissertation grant awardees from the International Research Foundation for English Language Education (TIRF) and four overview chapters are written by well-known experts in English language education. Each research chapter addresses issues that motivated the research, the context of the research, data collection and analysis, findings, and implications for practice, policy, and future research. The TIRF-sponsored research was made possible by a generous gift from Betty Azar. This book honors her contributions to the field and recognizes her generosity in collaborating with TIRF to support research on English grammar teaching and learning. English Grammar is the second volume in the Global Research on Teaching and Learning English series, co-published by Routledge and TIRF.

In the spring of 2014, the Sunflower Movement’s three-week occupation of the Legislative Yuan brought Taiwan back to international media attention. It was the culmination of a series of social movements that had been growing in strength since 2008 and have become even more salient since the spring of 2014. Social movements in Taiwan have emerged as a powerful new actor that needs to be understood alongside those players that have dominated the literature, such as political parties, local factions, Taishang China, and the United States. This book offers readers an introduction to the development of these social movements by examining a number of important movement case studies that focus on the post-2008 period. The return of the Kuomintang (KMT) to power radically changed the political environment for Taiwan’s civil society, and so the book considers how social activists responded to this new political opportunity. The case chapters are based on extensive fieldwork and are written by authors from a variety of disciplinary backgrounds and methodological approaches. In some cases, authors combine being both academics and activists. The chapters focus on a number of core issues, providing the book with four key aims: firstly, it investigates the roots of the movements and considers how to best explain their emergence; secondly, it examines the development trajectories of these movements; thirdly, it looks at the best way to explain their impact and development patterns; and finally, it assesses their overall impact, questioning whether they can be regarded as successes or failures. Covering a unique range of social movement cases, the book will be of interest to students and researchers interested in Taiwanese society and politics as well as social movements and civil society.

data for a greener world presents a structured discussion on how to measure the economic and financial dimensions of climate change. It combines economic theory and analysis with real-world examples of how climate data can be constructed for different country settings based on existing climate science and economic data. The book identifies important climate data gaps as well as practical and innovative approaches to close many of these gaps. The book discusses how to track greenhouse gas emission by production and consumption (chapters 1 and 2) which lead to physical risks (chapters 3 and 4) and transition risks (chapters 5 and 7), and concludes with cross-border implications of climate risks (chapters 8 and 9). The book also showcases a collaboration of seven international organizations: European Central Bank, Eurostat, International Energy Agency, International Monetary Fund, Organisation for Economic Co-operation and Development, World Bank, and World Trade Organization. Chapter contributions come from leading practitioners and experts in the fields of energy and climate change issues. This volume also serves as a reference guide for the IMF's climate change indicators dashboard and future research in this area.

This book is an invitation to delve into the world of game-based learning to understand the many facets that make games a truly interesting and effective tool to teach and train in the 21st century. It includes nine chapters which were initially presented at the IGBL conference, a conference held throughout Ireland where researchers, practitioners, students, and other stakeholders meet and share their interest in games and education. These chapters touch on some very important topics including games for health, formal education, poetry and games, science teaching through mobile games, relaxation with gaming devices, and accounting for disabilities with handheld devices. Together, these chapters illustrate the advancements in the field of game-based learning. The challenges faced by developers and educators as well as the opportunities that this medium can offer each chapter is written with practicality in mind in an effort to provide the reader with both a solid theoretical approach and background coupled to some practical guidelines and suggestions that can be applied easily.

this groundbreaking resource presents a wealth of findings and perspectives previously unseen in the LGBT literature. Its focus on psychological, sociopolitical, and care delivery issues affecting LGBT elders reveals both the nuanced interplay between diverse sources of identity and multiple sources of stigma and discrimination. Specific chapters highlight challenges and resiliencies impacting subpopulations, e.g., racial groups, veterans, and immigrants. The handbook examines employment and advocacy issues, discusses later life concerns in context, and offers guidelines for relevant ethical practice. Contributors represent a wide range of fields from psychiatry and gerontology to public health and public policy, reflecting the scope and needs of this diverse and complex population. Among the topics in the handbook are family relationships of older LGBT adults, the intersection of identities, race, age, sexuality, and care network; bisexuality, an invisible community among LGBT elders; implications of the Supreme Court ruling on same-sex marriage; no money, no work, and you're old; disabilities among LGBT elders; responses of medicine, public health, rehabilitation, and social work. Handbook of LGBT Elders is an essential reference for mental health professionals, psychologists, and social workers who work with the LGBT community and the elderly, as well as researchers interested in the LGBT community and aging.

This book seeks to demonstrate the significance of ancestor christology in African Christianity for christological developments in World Christianity. Ancestor christology has developed in the process of an African conversion story of appropriating the mystery of Christ Eph 3:4 in the category of ancestors logos. Christology in early Christian history developed as an intricate byproduct in the conversion process of turning Hellenistic ideas towards the direction of Christ. A. F. Walls, Hellenistic Christian writers, and modern African Christian writers thus share some things in common and when their efforts are examined within the conversion process framework, there are discernible modes of engagement. The mode of logos christology that one finds in Origen, for example, is an innovative application of the understanding of Jesus Christ as logos incarnate. A new key but not discontinuous with the Johannine suggestive mode or the clarificatory mode of Justin Martyr. African ancestor christology is at the threshold of an innovative mode, and the argument this book makes is that this strand of African christology should be pursued in the indigenous languages aided by respective translated bibles. A suggested way is a logos ancestor nanas?m discourse in Akan Christianity.
